

Super Browse — History

8.00 (2011/06/04)

Features

- Updated installer for the latest Clarion 8.0.

7.41 (2011/05/08)

Bugs

- Changed PRIORITY(0) to PRIORITY(1), as Clarion 8 no longer supports this undocumented value.

7.40 (2011/05/05)

Features

- Compatible with Clarion 6 through 8.0.

7.30 (2011/01/09)

Features

- Compatible with Clarion 6 through 7.3.

7.20 (2010/06/20)

Features

- Compatible with Clarion 6 through 7.2.

7.02 (2010/04/20)

Bugs

- The installer was aware of Clarion 7.0, but not 7.1.

7.01 (2010/04/18)

New Password!

We no longer officially support Clarion 5.5 and earlier versions!

Features

- Compatible with Clarion 6 through 7.1.

Bugs

- (*Clarion*) When using ActionHeaders, there was a problem with auto-positioning the browse after an update.

- *LocatorTabs* caused error when parent *Browse* object name was changed from default.
- *(ABC)* *EscKey* and *CloseWindow* save modified EIP value, rather than cancelling the modification.

6.73 (2008/05/23)

Features

- Installer permits overriding of destination folders.

Bugs

- Fixed a couple of problems with the example program.

6.72 (2008/05/14)

Features

- Global LIST Line Height template
- *(ABC)* Improved checkbox EIP support
- *(ABC)* FileDropCombo support in EIP
- *(ABC)* Conditional column hiding in EIP
- *(ABC)* Optionally pass parameters to EIP lookup procedures
- *(ABC)* Enforce validation file moving backwards through EIP columns
- *(ABC)* EIP Lookups via button (both file and calendar) can automatically go to next column after user makes selection.
- *(ABC)* Added support for Text EIP fields.
- *(ABC)* The form-based *RestoreChildAfterCancel* now supports the *SaveChangeButton* template (in addition to *SaveButton*). We also improved error handling and memory clean-up.
- *(ABC)* Optionally pass parameters to column lookup procedures.
- *(ABC)* Columns which are conditionally disabled for EIP can be hidden as well. Note that this hiding applies to the column in all rows, whereas the conditional EIP disabling can work differently for each row.

Bugs

- *(ABC)* Improved handling of True/False fields, when using values other than 1/0.
- *(ABC)* Fixed problem with Disabling Conditions, when earlier columns have color/icon/etc. attributes.
- *(ABC)* Fixed errors regarding *ListBoxFeq* and *FieldNo*.

6.51 (2004/10/05)

Bugs

- Fixed usage of *CHOOSE* to correspond with new behavior in 6.1.

6.50 (2004/10/04)

- Concurrent with Super Stuff 6.50.

6.15 (2004/07/28)

- New Password!

6.12 (2004/06/21)

Features

- Compatible with Clarion 6.1-RC3.

6.11 (2004/05/25)

Bugs

- Fixed problem with improperly positioned RETURN statement in TakeButtonAccepted.

6.10 (2004/05/15)

Features

- Compatible with Clarion 6.1-EA1.

6.03 (2003/12/05)

Features

- Added "Insertion point" setting, to control where EIP inserts occur in C6/ABC.

Bugs

- Fixed problem with generation of DLL exports, which could cause an "Ordinal out of sequence" error.

6.02 (2003/12/01)

Features

- Added Priming settings when inserting records in BrowseEntry (EIP) for ABC. (It was already for the Clarion chain.)
- Added "Delete Action" setting, to determine how deletes are confirmed/prevented for ABC. (It was already for the Clarion chain.)

6.01 (2003/12/01)

Features

- Compatible with Clarion 6.
- ActionHeaders can optionally include UPPER() attribute in its PROP:Order statements.

- Generation of the RETURN statement in TakeButtonAcceptedLookup has been shifted to a lower position, to allow for extra code between the lookup operation and the return.
- RestoreChildAfterCancel has new a logout method of "None", to suppress transaction handling.
- RestoreChildAfterCancel uses the full PrimeRecord+Insert, rather than just calling Insert, to ensure proper auto-sequencing, etc.

Bugs

- RestoreChildAfterCancel was not explicitly freeing its queue. Usually this wasn't a problem, but in certain unusual situations it could cause strange results.
- LocatorTabs destroys it's extraneous tab control after creating the others now, rather than before.
- Fixed problem with support for MultiProject.

4.90 (2000/09/26)

Features

- Compatible with C55-cr2.
- This is the last version to support Clarion 4.0!
- Added support for CapeSoft's MultiProject.

Bugs

- Fixed problem with conditionally disabling columns in EIP template.
- Fixed problem handling really large format strings in ConditionalFormat template.

4.40

Features

- Added support for C55-beta2.
- Last version to support Clarion 4.

4.34

Bugs

- Fixed compatibility problem with C5a. (TakeSelected was not called.)

4.32

Bugs

- Fixed compatibility problem with C4.

4.30

Features

- Added ability to turn off locator tabs.
- If you are using calendar lookup support, don't forget to import CALENDAR.TXA into your APP.

4.20

Features

- New "Date Lookup" support for Edit-In-Place
- "Each Column Sorts Itself" option in ActionHeaders
- The "Disable Column Edit" feature will not work until Clarion 5a.
- EIP support code is concurrent with SuperInvoice 4.10

Bugs

- Many improvements in ActionHeaders. Be careful of using "Exclude Null" in your keys, as this can trick the VIEW engine into omitting records when using a custom order.
- IMM attribute is added to EIP field if it exists in dictionary settings.

4.10

Features

- First SuperSolutions Templates

4.00

Features

- Compatible with Clarion 4 ABC templates
- New BrowseEntry Edit-In-Place implementation
- Global Bold Tabs
- Global Color List Selector
- Global Tab Popups
- Conditional Formats
- Select Mode Cancel Button
